LAUNCH OF THE COMPETITION NEXT MARCH 18, 09:00 AM

15

EUROPAN 15 para jóvenes arquitectos

Concurso bienal de ideas para arquitectos menores de 40 años.

Los ejes de esta decimoquinta edición son la gestión de los recursos públicos, la movilidad y la equidad social. Cómo limitar el consumo y la contaminación del agua o el aire o de qué forma alcanzar un equilibrio territorial que erradique las desigualdades actuales son algunas de los temas de esta nueva edición en la que participan doce países, incluido España.

Plazo de entrega de propuestas: 28/07/2019.

Entre los emplazamientos propuestos está un solar en Lasarte-Oria.

EUROPAN 15 arkitekto gazteentzat

40 urte baino gazteago diren arkitektoentzako bi urtez behingo ideia lehiaketa.

Hamabosgarren edizio honen ardatzak baliabide publikoen kudeaketa, mugikortasuna eta zuzentasun soziala dira. Nola mugatu airearen eta uraren kontsumoa eta kutsadura edo gaurko desberdintasunak erazten dituen lurralde-orekara heltzea diran edizio berri honetako gai batzuk. Edizio honetan hamabi herrialdek parte hartzen dute, Espainia barne.

Proposamentak aurkezteko epea: 2019/07/28

Proposatutako kokapenen artean Lasarte-Oriako orube bat dago.

WHEN ATTITUDE BECOMES ARCHITECTURE SPAIN

HENRI QUILLÉ.
WHEN ATTITUDE BECOMES ARCHITECTURE

With the support of the Union of Mediterranean Architects UMAR, the workshop will provide a platform for an immersive cooperation between young architects and students of architecture in a hands-on, design-built workshop. Emphasis will be placed on making. Design will manifest through the process of physical testing ranging from the scale of individual component and joint to assemblage, to the whole and back again, in a cyclical process towards refinement. Making and physical testing will be the main activity of the workshop, while drawing and designing will be utilised as a continuous tool throughout the duration of the workshop as a means of pinpointing arising construction issues brought forth by the ongoing, hands-on development. Beyond the emphasis on making, aspects of materiality, the environment, programmatic performance and human well-being will also be considered. Design of the structure will be prepared beforehand. Details and joints will be proposed and developed based on an integration of manual and digitally fabricated joinery and fabrication techniques. Proposals for the display of information about Platres village may also be considered during the workshop but production and installation of these elements will take place at a later stage.

The Global Summer School lectures have been held by several professionals, experts in the disciplines of robotics, simulation, physical computing, parametric design, architecture, digital fabrication and other disciplines. During the course of global lectures, specific emphasis is placed on understanding the implications of design on advanced urbanism and technology, thus creating new perspectives to improve critical research for our digitally connecting cities to develop a more sustainable urban culture. Each node from a diverse geographical location assists and participates to the global lectures series, that every year happen simultaneously for all GSS participants. Being part of IAAC Global Summer School represents the opportunity to have a greater in-depth understanding on architecture, design and technological advanced solutions from specialists of the fields.

Within the program of the Balearic Island's Summer School 2019 we present Henri Quillé. When Attitude Becomes Architecture. The workshop revisits an overlooked chapter in the recent history of Architecture: a critical anthology of Henri Quillé's oeuvre in Formentera, and touches upon questions of modern, timeless and self-sufficient architecture; the myth of the Mediterranean island and sustainability. A multi-format program consisting of an immersive summer school, a seminar and an exhibition; and which includes lectures by Carles Oliver and Curro Claret; recounts of the Formentera's architecture and resources by Marià Castells, Tami Quillé and Som Energia Elvissa; an introduction of Broner and Sert by Elena Ruiz (MACE); and the reacts of H Arquitectes and Antoni Ramon (ETSAB-UPC). Curated and directed by Guillem Aloy, Toni Gelabert and Tomeu Ramis.
